Beamz Interactive
International Product Specialist

12th May 2014

Dear Christian,

I would like to give you some feedback on our experience of using the Beamz over the past 3 months.

The Beamz has opened up a new world of music to my 11 year old daughter Becky, who has severe quadriplegic cerebral palsy. Unable to hold or play any of the musical instruments that her mainstream friends are learning, the Beamz Tobii edition has given her access to a wide range of music, styles, rhythms and instruments in a format that she can access using her eyes. For the first time she has been able to mix a track and start composing music of her own, giving her much enjoyment and a great sense of achievement. The software is very clever in the way the instruments are added to the backing tracks, and whatever Becky does sounds great – there is no way to go wrong and the Beamz builds creativity so that even a severely disabled child like Becky can experience great success in music making.

Becky says "It is easy to do and it is fun! I can make my own music and save it. I can also play music with my friends now. Thank you Beamz!"

We wish you and the Beamz every success in the future!

Yours sincerely,

Fiona Tyler
