The 'Beamz' equipment has brought new excitement and interest into our music lessons.

The 'Beamz' units are a clever combination of tactile and diverse movement activated sound controllers; which allow all children to access the programs and feel like they are creating real music without the need to be a professional musician.

The software provides a large range of songs and sounds which can be customised to suit the needs of the lesson.

The hardware also provides opportunities for problem solving, sharing and teamwork where more than one child can be stationed at each unit.

Since bringing 'Beamz' into the classroom, the children have shown a new interest in music technology. The units work beautifully alongside our existing equipment to provide quality musical learning experiences.

Paul Boucher
Music Co-ordinator and Classteacher
