Dear Ruth,

I want to take a moment to thank you for your generous donation of the BEAMZ Professional Interactive Music System to our Regional Program for the Deaf here at Lamar Elementary School. I work with students, both disabled and non-disabled, from three years old up to fifth grade.

My students love the BEAMZ! The immediate feedback they receive when using this phenomenal instrument makes it very effective for positive behavior support. We have used the BEAMZ as a reward in social skills training and speech therapy. Our hearing impaired students have even used it for sound recognition with the individual instruments produced in the music tracks and the animal noises produced in the "Old McDonald's Farm" track. Familiar songs come to life with the BEAMZ and new songs and instruments make learning fun! The BEAMZ has been an effective tool whether the activity is goal oriented or we are just having fun. Our students enjoyed the BEAMZ so much that I bought one to use at home with my own children and grandchildren.

Our plans for next year are bigger and better than ever! BEAMZ will be integrated into our ACE program, which is our Achievement through Commitment to Education Scholarship program. We celebrate our students success through rallies held each six weeks grading period. Next year these rallies will include students using the BEAMZ during their class presentations. We would like to incorporate BEAMZ into our school wide programs in music and physical education for our parents next year as well. In closing, I want to thank you once again for your donation of the BEAMZ to our program. It has given us a creative and exciting tool to add to our daily activities with all of our students.

Sincerely,  
Colleen A. Presley M.Ed., LPC, NCC  
School Counselor
